SECOND QUARTER

Quarterly report

Presentation

Press releases

Norske Skog

INTRODUCTION

Norske Skog is a producer of packaging paper and publication paper across five mills in Europe and Australasia. Packaging paper includes testliner and fluting and publication paper includes newsprint and magazine paper. The annual production capacity of packaging paper will be 0.8 million tonnes during 2026 and the annual publication paper production capacity is 1.6 million tonnes. Packaging paper and publication paper are sold through sales offices and agents.

In addition to the traditional publication paper business and the new packaging paper business, Norske Skog aims to further diversify its operations and continue its transformation into a diversified wood fibre processing company.

Norske Skog has approximately 2 100 employees and the parent company, Norske Skog ASA, a public limited liability company, is incorporated in Norway and has its head office at Skøyen in Oslo. The company is listed on Oslo Stock Exchange with the ticker NSKOG.

REPORT OF THE BOARD OF DIRECTORS FOR THE SECOND QUARTER OF 2024

- Earnings positively impacted by recognised insurance at Norske Skog Saugbrugs
 - Quarterly EBITDA of NOK 471 million impacted positively by NOK 338 million from recognised insurance compensation following the rockslide
 - Achieved positive EBITDA from Packaging Paper segment in the quarter
- Positive development in containerboard and publication paper markets, but closures still required
 - Price increases for containerboard and newsprint being implemented to mitigate cost increases
 - Containerboard and publication paper markets still experiencing excess capacity, but publication paper closures being announced
- Maintaining excellent customer feedback as containerboard deliveries continue to grow
 - Norske Skog Bruck PM3 delivering 41 140 tonnes of containerboard in the quarter, expect around 85% utilisation of design capacity by the second half 2024
 - Start-up of Norske Skog Golbey PM1 during the second half of 2024 will increase Norske Skog's total production capacity with more than 30%
- Starting pre-engineering (main study) for BCTMP at Norske Skog Saugbrugs
 - Norske Skog Saugbrugs well suited for BCTMP production, utilising a large share of existing machinery, equipment, infrastructure and personnel
 - Expect conclusion of pre-engineering and final investment decision during the first half of 2025
- Maintaining a strong cash position following bond refinancing
 - During the quarter, the EURIBOR +550 bps EUR 150 million secured bond was refinanced with a NIBOR +450 bps NOK 1 400 million unsecured bond
 - Received support from DNB for a NOK 500 million term loan at Skogn and a NOK 50 million overdraft facility, signing expected during the third quarter of 2024

PROFIT/LOSS FOR THE PERIOD

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Operating revenue	2 725	2 551	3 118	5 276	6 289
Other operating income	492	137	287	630	436
Total operating income	3 217	2 688	3 404	5 905	6 725
Distribution cost	-309	-297	-289	-606	-535
Cost of materials	-1 692	-1 547	-1 948	-3 239	-3 582
Fixed cost	-745	-769	-787	-1 514	-1 552
EBITDA	471	76	380	546	1 055

Higher operating revenue in the quarter compared to the previous quarter mainly driven by higher delivery volumes and higher sales price, partly offset by lower income from sale of excess energy. Other operating income increased as a result of insurance recognition at Norske Skog Saugbrugs of NOK 338 million. Publication paper prices were slightly higher in the quarter due to mix effects, and packaging paper prices increased in line with the market. Production of packaging paper increased as ramp-up continued as planned.

Cost of materials per tonne increased slightly in the quarter. Recovered paper prices increased in the quarter, energy prices were volatile at normalised levels, and pulpwood prices remained at high levels.

Fixed costs (including employee benefit expenses) decreased compared to the previous quarter both on absolute and per tonne basis.

EBITDA increased quarter-over-quarter, mainly driven by insurance recognition at Norske Skog Saugbrugs and higher delivery volumes and sales prices.

NORSKE SKOG QUARTERLY REPORT – SECOND QUARTER 2024 (UNAUDITED)

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Restructuring expenses	0	-13	-10	-13	-11
Depreciation	-128	-125	-128	-254	-243
Impairments	-22	0	0	-22	0
Derivatives and other fair value adjustments	44	-115	-96	-71	-570
Operating earnings	364	-177	146	187	231

Depreciation of NOK 128 million is a slight increase compared with the previous quarter. Impairment of NOK 22 million in the quarter relating to property, plant and equipment at Norske Skog Boyer. Restructuring cost were zero in the quarter.

The fair value of energy contracts in Norway increased compared to the previous quarter due to differences between future market prices for electricity and contract electricity prices.

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Share of profit in associated companies and joint ventures	-25	-5	-4	-30	-7
Financial items	-29	-200	-101	-229	-332
Income taxes	-66	54	5	-12	-27
Profit/loss for the period	245	-328	45	-83	-135

Share of profit in associated companies and joint ventures was negative by NOK 25 million, which reflects the impact from change in market value and the result from Circa Group.

Financial items were negative by NOK 29 million in the second quarter, mainly due to currency changes on euro denominated debt and foreign exchange contracts.

The income tax in the quarter relates mainly to changes in deferred tax for the operations in Norway.

DIVERSIFICATION BEYOND PUBLICATION PAPER

Norske Skog continues to ramp-up production in the packaging paper market following the successful start-up of Norske Skog Bruck PM3. Delivered volumes of recycled containerboard increased during the second quarter. Norske Skog Golbey in France is converting PM1 for production of packaging paper and will start production in the second half of 2024. When full capacity is reached at both Norske Skog Bruck PM3 and Norske Skog Golbey PM1, Norske Skog will have a production capacity of 0.8 million tonnes of recycled containerboard.

During the quarter, Norske Skog announced the start of pre-engineering (main study) for the production of bleached chemi-thermomechanical pulp (BCTMP) at Norske Skog Saugbrugs.

Commercial development of CEBINA and CEBICO continues together with partners.

Norske Skog holds an approximately 26% ownership stake in Circa Group AS, listed under the ticker code CIRCA at Euronext Growth Oslo.

The group continuously works to develop several other fibre projects, both on a stand-alone basis and in partnerships.

SEGMENT INFORMATION

PUBLICATION PAPER EUROPE

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Total operating income	2 514	2 058	2 843	4 572	5 708
EBITDA	464	166	429	630	1 191
EBITDA margin (%)	18.4	8.1	15.1	13.8	20.9
Return on capital employed (%) (annualised)	2.2	-8.4	-7.3	-3.2	4.9
Production (1 000 tonnes)	279	272	232	551	509
Deliveries (1 000 tonnes)	279	262	267	541	512
Production / capacity (%)	87	85	74	86	76

The segment consists of Norske Skog's European operations in the publication paper market with industrial sites in Norway, France, and Austria. Annual production capacity is currently approximately 1.3 million tonnes.

Operating income increased from the previous quarter mainly as the quarter recognised NOK 338 million in insurance at Norske Skog Saugbrugs. In addition, higher delivery volumes and slightly higher prices due to mix effects contributed positively. Lower sale of excess energy contributed negatively compared to the previous quarter.

Distribution costs increased from the previous quarter on an absolute basis and decreased on a per tonne basis. Cost of materials increased on an absolute basis and on a per tonne basis, mainly due to recovered paper prices.

Employee benefit expenses increased on an absolute level and decreased on a per tonne basis. Other operating expenses increased on an absolute level and on a per tonne basis.

EBITDA increased compared to the previous quarter mainly due to recognition of insurance at Norske Skog Saugbrugs.

Demand for standard newsprint in Europe decreased by 1% as of May 2024 compared to the same period last year. For magazine paper the demand decreased by 6%, with supercalendered paper decreasing 11% and lightweight coated paper decreasing 1% for the same period (Source: Euro-Graph).

Capacity utilisation was 87% in the period, a slight increase compared with the previous quarter.

EBITDA

PUBLICATION PAPER AUSTRALASIA

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Total operating income	472	438	489	909	922
EBITDA	6	-74	-5	-68	-28
EBITDA margin (%)	1.3	-17.0	-1.1	-7.5	-3.0
Return on capital employed (%) (annualised)	-1.1	-67.5	-14.5	-35.3	-18.0
Production (1 000 tonnes)	60	59	61	118	116
Deliveries (1 000 tonnes)	60	59	63	119	119
Production / capacity (%)	90	89	92	89	88

The segment consists of Norske Skog Boyer's publication paper operations in Australasia, the only domestic publication paper producer in the region. The annual production capacity is approximately 0.3 million tonnes.

Operating income increased compared to the previous quarter due to higher deliveries and sales prices as a result of mix effects.

Distribution costs were higher compared to the previous quarter on an absolute level and similar on a per tonne basis. Cost of materials were lower on an absolute basis and on a per tonne basis. Employee benefit expenses were lower on an absolute basis and on a per tonne basis. Other operating expenses were lower on an absolute and a per tonne

basis due to deconsolidation of Norske Skog Tasman in the previous quarter.

EBITDA was higher compared to the previous quarter, mainly due to negative impact from deconsolidation of Norske Skog Tasman in the previous quarter.

Demand for newsprint and coated mechanical decreased by 33% and 2%, respectively through May 2024 compared to same period last year (Source: PPPC).

Capacity utilisation was 90% in the period, an increase compared to the previous quarter.

PACKAGING PAPER

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Total operating income	207	177	75	384	99
EBITDA	2	-7	-40	-5	-79
EBITDA margin (%)	0.8	-3.7	-53.9	-1.3	-79.2
Return on capital employed (%) (annualised)	-0.6	-2.2	-36.2	-1.4	-68.2
Production (1 000 tonnes)	40	40	20	80	20
Deliveries (1 000 tonnes)	41	38	10	79	10
Production / capacity (%)	87	86	71	87	71

The segment consists of Norske Skog's packaging paper operations in Europe. Norske Skog Bruck PM3 started producing in the first quarter of 2023 and the production is following the ramp-up curve with higher deliveries compared to previous quarter. Delivered volumes is expected to increase gradually during the coming quarters as ramp-

up continues. When full capacity is reached, Norske Skog Bruck will have a production capacity of 0.2 million tonnes of recycled containerboard.

Norske Skog Golbey in France is currently converting PM1 for production of packaging paper and will start production in the second half of 2024. When full capacity is reached, Norske Skog Golbey will have a production capacity of 0.6 million tonnes of recycled containerboard. For Norske Skog Golbey, the remaining net capex is approximately NOK 300 million.

The machines are expected to operate at 60-70% utilisation in the first year of operation. Once at full utilisation, the machines are expected to generate annual EBITDA of EUR 70-80 million, based on historical prices and margins seen in the market.

EBITDA in the period was slightly positive due to higher delivered volume and higher sales prices.

OTHER ACTIVITIES

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Total operating income	189	158	89	348	150
EBITDA	-1	-9	-2	-10	-29

Operating income in other activities mainly consist of sourcing solutions and non-paper related operations.

Other activities include unallocated headquarter costs. The unallocated headquarter costs are estimated to be EBITDA negative by approximately NOK 40 million annually but are not uniformly distributed throughout the quarters of the year.

CASH FLOW

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
EBITDA	471	76	380	546	1 055
Change in working capital	201	-71	541	130	353
Restructuring payments	-6	-13	-29	-20	-31
Gain and losses from divestments	0	46	-1	46	2
Insurance compensation from property damage	-338	-52	0	-390	0
Net financial items	-52	-51	-36	-103	-71
Taxes paid	15	-2	-553	13	-569
Other items	9	-2	50	6	44
Net cash flow from operating activities	299	-69	353	229	783
Purchases of property, plant and equipment and intangible assets	-442	-338	-697	-781	-1 266
-whereof maintenance capex	-57	-32	-87	-89	-150

Net cash flow from operating activities was NOK 299 million in the second quarter.

The operating cash flow was positively impacted by a decrease in working capital of NOK 201 million, as a result of CO2 related proceeds.

Restructuring payments in the quarter are mainly related to settlement of restructuring costs due to organisational changes.

Net financial items in the second quarter relate mainly to interest payments.

Maintenance capex of NOK 57 million relate to ordinary maintenance in the quarter, an increase from the previous quarter.

Remaining purchases of property, plant and equipment and intangible assets mainly relate to investments in the packaging paper projects at Norske Skog Golbey, the TMP capacity expansion project at Norske Skog Skogn and ongoing work at Norske Skog Saugbrugs.

BALANCE SHEET

NOK MILLION	30 JUN 2024	31 MAR 2024	31 DEC 2023	30 JUN 2023
Non-current assets	9 660	9 633	9 068	8 691
Cash and cash equivalents	2 784	1 915	2 463	2 673
Inventories, trade and other receivables and other current assets	2 757	3 096	3 223	3 325
Total assets	15 201	14 644	14 755	14 689
Equity	6 138	6 004	6 161	6 208
Non-current liabilities	5 275	5 757	5 680	5 378
Current liabilities	3 789	2 883	2 914	3 104
Net interest-bearing debt	2 970	3 246	2 590	1 746

Total assets increased in the second quarter, mainly due to an increase in cash and cash equivalents as proceeds from the NOK 1 400 million bond issue were received prior to quarter end and the remaining principal of NOK 977 million from the refinanced bond issue was paid following quarter end.

Non-current liabilities were lower than the previous quarter reflecting buy-back of EUR 150 million bonds of EUR 50 million, instalments of local debt, and currency changes on euro denominated debt, offset by issuance of new bond.

Current liabilities were higher than the previous quarter, mainly due to the remaining principal of NOK 977 million of the refinanced bond issue repaid following quarter end, being reclassified from non-current.

Local debt to finance the packaging paper projects at Norske Skog Bruck and Norske Skog Golbey had an outstanding amount of approximately EUR 239 million at quarter end, compared to EUR 244 million at previous quarter end.

Net interest-bearing debt decreased from NOK 3 246 million to NOK 2 970 million in the quarter, mainly due to receipt of CO2 compensation and sale of CO2 allowances, as well as a stronger NOK influencing EUR-denominated debts.

OUTLOOK

The development in the global economy is of vital importance for consumer spending, and this impacts the publication paper and packaging paper industry, and thus Norske Skog's operations and results. Norske Skog's deliveries have continued to improve during the second quarter of 2024 and is expected to improve through 2024.

The raw material and energy markets, which are important for both publication paper and packaging paper production, are expected to remain uncertain, although prices have come down closer to historical levels. Cost of recovered paper has increased significantly, and the quality and availability has deteriorated. This trend is expected to persist for the remainder of 2024. Pulpwood prices is expected to remain at higher levels for 2024.

The level of input costs and demand for paper will continue to influence paper sales prices in Europe. Both publication and packaging markets are characterised by excess capacity and capacity reductions are required to balance the markets. Utilisation is expected to remain weak until capacity is reduced.

The production of recycled containerboard in Norske Skog Bruck is expected to increase in line with plan over the coming quarters. However, the EBITDA from the Packaging Paper segment in 2024 is expected to be negative due to allocation of fixed costs following start-up of production in Norske Skog Golbey the second half of 2024.

Norske Skog Saugbrugs has initiated pre-engineering (main study) to produce bleached chemi-thermomechanical pulp (BCTMP), with expected final investment decision in the first half of 2025. Potential investments into a BCTMP project at Saugbrugs will result in recognition and receipt of additional insurance compensation of NOK 615 million.

In Australasia, markets remain challenging with a large share of volume being delivered in low margin export markets. There is continuous effort to improve the mill's cost position and commercial terms.

Norske Skog will continue to develop its industrial sites with new fibre projects based on efficient use of certified fibre and renewable energy, both on a stand-alone basis and in partnerships.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. GENERAL INFORMATION

Norske Skog ASA (“the company”) and its subsidiaries (“the group” or “Norske Skog”) produce, distribute and sell publication paper and packaging paper. This includes newsprint, magazine paper and recycled containerboard.

All amounts in the interim financial statements are presented in NOK million unless otherwise stated. Due to rounding, there may be differences in the summation of columns and rows.

The table below shows the applied average (un-weighted monthly) foreign exchange rates per quarter and the closing exchange rate at month ends for the most important currencies for the group.

	Q2 2024	Q1 2024	30 JUN 2024	31 MAR 2024	31 DEC 2023
AUD	7.08	6.91	7.09	7.04	6.91
EUR	11.56	11.42	11.40	11.68	11.24
GBP	13.56	13.33	13.47	13.62	12.93
USD	10.74	10.51	10.65	10.80	10.17

2. ACCOUNTING POLICIES

The interim financial statements of Norske Skog have been prepared in accordance with IAS 34 Interim Financial Reporting. The interim financial statements do not include all information required for full annual financial statements and should be read in conjunction with the consolidated financial statements for 2023. The interim financial statements are unaudited.

The accounting policies applied in the preparation of the interim financial statements are consistent with those applied in the preparation of the consolidated financial statements for the year ended

31 December 2023, except for the adaptation of amended standards and new interpretations, which are mandatory from 1 January 2024. These changes are described in the consolidated financial statements for 2023.

The group has not early adopted any standard, interpretation or amendment that has been issued but is not yet mandatory.

3. ESTIMATES, JUDGEMENTS AND ASSUMPTIONS

Preparation of interim financial statements in accordance with IFRS implies use of estimates, which are based on judgements and assumptions that affect the application of accounting principles and the reported amounts of assets, liabilities, revenues and expenses. Actual amounts might differ from such estimates.

Recoverable amount of intangible assets and property, plant and equipment

Property, plant and equipment are tested for possible impairment charges whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. A prolonged decrease in prices or demand beyond the historical level could be an indicator of impairment and an impairment test will be prepared. The recoverable amount is the higher of an asset’s fair value less sales costs or its value in use. Value in use is the present value of the future cash flows expected to be derived from a cash-generating unit. The key drivers of profitability in the industry and thus asset values for Norske Skog are product prices relative to production costs.

Accounting treatment of physical energy contracts and other financial instruments

Norske Skog’s portfolio of commodity contracts consist mainly of physical contracts that are settled through physical delivery. Embedded derivatives in commodity contracts are measured at fair value and embedded derivatives that are not traded in an active market, are assessed through valuation techniques. The fair value of embedded derivatives in physical contracts vary depending on changes in currency and price indexes.

Commodity contracts that fail to meet the “own-use exemption” criteria in IFRS 9 *Financial instruments* – recognition and measurement are recognised in the balance sheet and valued at fair value.

The group uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at each balance sheet date. See Note 22 in the consolidated financial statements for 2023 for more information regarding the calculation of fair value of derivatives.

See Note 3 in the consolidated financial statements for 2023 for a more thorough description of important accounting estimates and assumptions impacting the preparation of financial statements.

4. OPERATING SEGMENTS

The activities of the Norske Skog group are separated into three operating segments, Publication Paper Europe, Publication Paper Australasia and Packaging Paper which is in line with how the group is managed internally. Norske Skog's chief operating decision maker is corporate management, who distribute resources and assess performance of the group's operating segments. Norske Skog has an integrated strategy across the three segments to maximise profits. The optimisation is carried out through coordinated sales and operational planning. The regional planning, in combination with structured sales and operational processes, ensures maximisation of profit.

Publication paper includes newsprint and magazine paper. Newsprint includes standard newsprint and improved newsprint used in newspapers, inserts, catalogues etc. Magazine paper includes the paper qualities supercalendered (SC) and lightweight coated (LWC). Magazine paper is used in magazines, catalogues, and advertising materials.

Publication Paper Europe segment encompasses production and sale of newsprint and magazine paper in Europe. All the four European

industrial sites and the regional sales organisation are included in the operating segment publication paper Europe.

Publication Paper Australasia encompasses production and sale of newsprint and magazine paper in Australasia. Norske Skog Boyer, the only producer of newsprint and magazine grade in the region, and the regional sales organisation is included in the operating segment publication paper Australasia.

Packaging Paper was established as a new reporting segment from 2023. The segment includes Norske Skog's production of recycled containerboard, mainly the grades testliner 3 and fluting. Testliner 3 and fluting are used by corrugators as outer and inner layers of packaging material. In 2023, the segment only comprised one machine, PM3, at Norske Skog Bruck. From the second half of 2024, Norske Skog Golbey PM1 will also be included in the segment. Production is expected to reach full capacity in the period 2025 to 2026.

Activities in the group that do not fall into the operating segments are presented under other activities. This includes corporate functions, sourcing solutions and other holding company activities.

6. ENERGY CONTRACTS, DERIVATIVES AND FINANCIAL INSTRUMENTS CARRIED AT FAIR VALUE

30 JUN 2024	ASSETS		LIABILITIES	
	CURRENT	NON-CURRENT	CURRENT	NON-CURRENT
Energy contracts and embedded derivatives in energy contracts (level 3)	47	0	26	234
Other derivatives and financial instruments carried at fair value (level 2)	14	0	3	0
Total	61	0	29	234

Norske Skog's portfolio of commodity contracts consists mainly of physical energy contracts some of which contain embedded derivatives related to currency. Certain of the energy contracts are measured at fair value. The fair value of commodity contracts is especially sensitive to future changes in energy prices in the region they cover.

The contract prices for energy in Norway are sensitive to change in publication paper prices and pulpwood prices. Externally forecasted price increases/decreases for paper increases/decreases the cost of energy. Contract prices vs market prices for energy have developed in opposite directions in the relevant energy areas in Norway, while a weaker NOK has impacted embedded derivatives negatively. There has been a net positive change in the fair value of the contracts and embedded derivatives in the quarter of NOK 44 million.

Changes in the value of energy contracts, commodity contracts and embedded derivatives in contracts are presented in the income statement line Derivatives and other fair value adjustments. A sensitivity analysis of the impact on profit after tax of fluctuations in energy prices, currency and price indices is given in Note 5 in the consolidated financial statements for 2023.

Financial derivative contracts are accounted for at fair value and changes in contracts are presented in the income statement under financial items. A sensitivity analysis of the impact on profit after tax of fluctuations in currency is given in Note 5 in the consolidated financial statements for 2023.

The valuation techniques used are described in Note 22 in the consolidated financial statement for 2023.

7. INVESTMENTS IN ASSOCIATED COMPANIES AND JOINT VENTURES

Investments in associated companies and joint ventures are accounted for in accordance with the equity method. The carrying value is NOK 51 million on 30 June 2024.

Norske Skog holds a 50% share of Porsnes Utvikling AS, an equal ownership joint venture between Ringstad Næringsutvikling AS and Norske Skog Saugbrugs AS. On 30 June 2024 this has a carrying value of NOK 7 million.

On 30 June 2024 Norske Skog holds a 26% share of Circa Group AS, with a carrying value of NOK 36 million. Loss is included in the quarter

with NOK 4.5 million. In addition, there has been an impairment of the shares of NOK 20 million in the quarter, to reflect the market value. Circa Group AS is listed on Euronext Growth. Due to later reporting dates than Norske Skog, the share of results from Circa Group is included with three months lag.

8. FINANCIAL ITEMS AND DEBT REPAYMENTS

FINANCIAL ITEMS

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023

Currency gains/losses*	54	-140	-54	-86	-244
Other financial items	-55	-20	-20	-75	-36
Total financial items	-29	-200	-101	-229	-332

*Currency gains/losses on trade receivables and trade payables are reported as operating revenue and cost of materials respectively.

FINANCING

Norske Skog has credit facility agreements in an aggregate amount of EUR 265 million to finance its investment in the conversion projects to recycled containerboard. EUR 193 million is for the project at Norske Skog Golbey and EUR 72 million for the project at Norske Skog Bruck. The borrowing entities are Norske Skog Bruck GmbH and Norske Skog Golbey SAS, and the facilities are fully guaranteed by Norske Skog ASA.

The facilities are drawn as capital expenditures are incurred, and repayment is scheduled to commence approximately upon completion of each respective project with average maturity towards the end of 2030. As of 30 June 2024, the outstanding amount was EUR 239 million.

During the second quarter, Norske Skog initiated a process to refinance the NSKOG02 EUR 150 million senior secured bond with the new NSKOG03 NOK 1 400 million senior unsecured bond. The remaining principal of EUR 85.7 million (NOK 977 million) was repaid on 1 July 2024, following quarter end. NSKOG03 matures in June 2029 and has an interest rate of NIBOR (zero floor) + 4.5% with quarterly interest payments. As of 30 June 2024, the outstanding amount under NSKOG02 and NSKOG03 was NOK 2 377 million.

Norske Skog has a EUR 31 million Revolving Credit Facility with a tenor of five years. As of 30 June 2024, the revolving credit facility was undrawn.

The EUR 54 million credit facility for the waste-to-energy plant in Norske Skog Bruck commenced repayments in the fourth quarter of 2022. As of 30 June 2024, the outstanding amount was EUR 39 million. The final maturity date is in 2028.

The remaining financing arrangements for the group includes leasing, factoring, and other credit facilities on mill level.

The financing covenants applicable to Norske Skog on a consolidated basis are (i) freely available and unrestricted cash and cash equivalents of minimum NOK 100 million, (ii) EBITDA* to net interest costs of minimum 2.0:1, and (iii) book equity to total assets of minimum 25% and (iv) minimum LTM EBITDA* of NOK 400 million. In addition, there are various company specific financial covenants applicable to the subsidiaries acting as borrowers under the respective credit facilities.

*The EBITDA used in the financial covenants' calculations may differ from the EBITDA shown in the financial reporting due to adjustment requirements in the financing agreements.

BONDS

MILLION	MATURITY	CURRENCY	INTEREST RATE	NOMINAL VALUE	AMOUNT OUTSTANDING 30 JUN 2024
NSKOG02	March 2026	EUR	EURIBOR +5.5%	150	86
NSKOG03	June 2029	NOK	NIBOR +4.5%	1 400	1 400

DEBT REPAYMENT SCHEDULE*

NOK MILLION	2024	2025	2026	2027	2028-
Bonds	977	0	0	0	1 400
Debt to credit institutions	289	753	533	688	1 039
Total	1 265	753	533	688	2 439

*Not including items relating to leases.

Total debt listed in the repayment schedule differs from the carrying value in the balance sheet. This is due to the amortized cost principle.

Financed amounts from securitisation arrangements is classified as interest-bearing current liabilities. This amounts to NOK 1 097 million in debt repayment in the third quarter of 2024. The financed amount represents a group of individual loans, which are settled individually at maturity of the trade receivable.

New loans are initiated on a consecutive basis based on new trade receivables included under the securitization agreement. The liability is in its nature current, and Norske Skog does not have an unconditional right to defer settlement beyond twelve months. The liabilities are liabilities that are settled through its normal operating cycle. The corresponding trade receivable is derecognised when the customer pays it.

9. NORSKE SKOG SAUGBRUGS ROCKSLIDE

On 27 April 2023 Norske Skog Saugbrugs was impacted by a rockslide that destroyed parts of the building and damaged machinery and equipment related to PM6. The damages to the building and infrastructure were extensive and PM6 has been stopped from the time of the impact.

Work has continued to secure the site from further rockslide and rebuild the damaged building and infrastructure.

Norske Skog Saugbrugs is covered for both property damage and business interruption as part of its group insurance program.

Property damage was mainly related to assets that were largely depreciated to low values. A write down of NOK 10 million related to destroyed assets was recognised in 2023.

On 2 November 2023 Norske Skog announced that it has agreed a settlement with the insurers in relation to both business interruption and property damage.

In relation to business interruption for the coverage period of 18 months from the date of the incident an amount of NOK 850 million was agreed. This has been recognised in full in 2023. NOK 635 million of the

insurance settlement proceeds was received in 2023 while the remaining NOK 215 million was received in the first quarter of 2024.

The property damage to building structures and cost of reinstatement of these as well as costs to secure rock formations will be covered by Norske Skog Saugbrugs, but fully reimbursed by the insurers. In second quarter NOK 43 million has been recognised and capitalised as property, plant and equipment.

In addition, a settlement of NOK 1 billion was agreed for investments in production equipment. Of this NOK 385 million has been paid in 2023, while the remaining amount of NOK 615 million will be paid as investment costs accrue and contingent of the amount of NOK 385 million being invested at Norske Skog Saugbrugs. In the income statement, the settlement for investments in production equipment has been recognised with NOK 77 million in 2023 and NOK 308 million in 2024, of which NOK 13 million was recognized in the first quarter and NOK 295 million in the second quarter following the initiation of a BCTMP main study. In addition, NOK 615 million will be received and recognised as investment costs accrue.

ALTERNATIVE PERFORMANCE MEASURES

The European Securities and Markets Authority's (ESMA) has defined guidelines for alternative performance measures (APM). An APM is defined as a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specific in the applicable financial reporting framework (IFRS). The company uses EBITDA, EBITDA margin and return on capital employed (annualized) to measure operating performance on group level. It is the company's view that the APMs provides the investors relevant and specific operating figures which may enhance their understanding of the performance.

EBITDA, EBITDA margin, variable costs, fixed costs, return on capital employed and net interest-bearing debt are defined by the company below.

EBITDA: Operating earnings for the period, before restructuring expenses, depreciation and amortization and impairment charges, derivatives and other fair value adjustments, determined on an entity, combined or consolidated basis. EBITDA is used for providing consisting information of operating performance and cash generating which is relative to other companies and frequently used by other stakeholders.

NOK MILLION	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023
Operating earnings	364	-177	146	187	231
Restructuring expenses	0	13	10	13	11

Q2 2024 presentation

12 July 2024

We create green value

Norske Skog

Sustainable fibre processing

Strategic transition

- Publication paper
- Packaging paper
- Fibre projects

→ Leading publication paper producer

- Newsprint capacity: 990kt
- LWC magazine capacity: 400kt
- SC magazine capacity: 200kt

→ Growing packaging paper producer

- RCCM capacity: 760kt (2025-26)
- Remaining net investment of NOK 0.3bn

→ Exploring fibre projects

- BCTMP capacity: 300kt (2027-28)
- Net investment of NOK 1.5-2.0bn, will unlock NOK 615m from insurance settlement

→ 2023 CDP Climate Change Score "A-"

Five high quality industrial sites

Eleven paper machines with supporting infrastructure for energy, fibre, and water

Quarter highlights

Second quarter 2024

Earnings positively impacted by recognised insurance at Saugbrugs

- Quarterly EBITDA of NOK 471m impacted positively by NOK 338m from recognised insurance in the quarter
- Achieved positive EBITDA from Packaging Paper segment in the quarter

Positive development in containerboard and publication paper markets, but closures still required

- Price increases for containerboard and publication paper being implemented to mitigate cost increases
- Containerboard and publication paper markets still experiencing excess capacity, but publication paper closures being announced

Maintaining excellent customer feedback as containerboard deliveries continue to grow

- Bruck PM3 delivering 41kt of containerboard in the quarter, expect around 85% utilisation of design capacity by H2 2024
- Start-up of Golbey PM1 during H2 2024 will increase Norske Skog's total production capacity with more than 30%

Starting pre-engineering (main study) for BCTMP at Saugbrugs

- Saugbrugs well suited for BCTMP production, utilising a large share of existing machinery, equipment, infrastructure, and personnel
- Expect conclusion of pre-engineering and final investment decision during H1 2025

Maintaining a strong cash position following bond refinancing

- During the quarter, the EURIBOR+550bps EUR 150m secured bond was refinanced with a NIBOR+450bps NOK 1 400m unsecured bond
- Received support from DNB for a NOK 500m term loan at Skogn and a NOK 50m overdraft facility, signing expected during Q3 2024

6

Q2 2024

Publication Paper Europe

→ EBITDA margin of 18% positively impacted by NOK 338m from recognition of insurance

→ Increased deliveries for all grades

→ Average prices slightly up from previous quarter due to product mix effects

→ Sold 226k CO2 allowances and received CO2 compensation for 2023 in the quarter

Publication Paper Australasia

→ EBITDA slightly positive due to higher deliveries and sales prices

Packaging Paper

→ Achieved positive EBITDA for the segment as containerboard deliveries continue to increase

→ Higher sales prices in line with the market

Containerboard ramp-up

Continued increase in production volume

Monthly RCCM production Bruck PM3

Thousand tonnes

Monthly RCCM production cost Bruck PM3

Golbey PM1 – 550kt containerboard capacity

- Cabling representing majority of remaining work
- Remaining net capex of NOK 0.3bn
- Expect containerboard production start-up in H2 2024

Bruck PM3 – 210kt containerboard capacity

- Continued growth in production and deliveries, expect around 85% utilisation end of 2024 in line with plan
- Excellent product quality and customer feedback
- Continue to improve production efficiency as utilisation and process optimisation increases

Saugbrugs fibre processing

Strong local support to secure Saugbrugs as cornerstone industry in Halden

BCTMP pre-engineering (main study)

- Starting pre-engineering for 300kt BCTMP production at Saugbrugs with final investment decision H1 2025
- Expected net investment of NOK 1.5-2.0bn based on early supplier discussions for proven and industry-standard equipment and technical solutions
- Production expected to start H1 2027 and full utilisation in H1 2028, achieving return on net investment above 20%
- In addition, investments in BCTMP investments will unlock remaining insurance payments of NOK 615m¹
- The project requires updating existing environmental permits and approval from certain lenders

SC magazine paper production continues

- Saugbrugs will continue to be a reliable supplier of 200kt SC magazine paper from PM4 and PM5

1) Insurance payments of NOK 615m to be received and recognised in other operating income as BCTMP investments accrue, Norske Skog will have to expense initial NOK 289m of investments

Top brownfield opportunity

Potential to become a cost-leading BCTMP supplier

Indexed to 100 per January 2019

Sources of cost competitiveness

- ✓ Industrial site and buildings with scale advantages and personnel experienced with TMP production
- ✓ Invested NOK 165m in 2020-21 to further enhance energy efficiency of high quality TMP lines
- ✓ Access to green hydro power with sufficient grid capacity (280 MW) in place
- ✓ Biomass boiler (70 MW) secures sustainable and competitive steam supply, covering BCTMP and SC magazine paper production
- ✓ Existing water treatment facilities with excess capacity to serve BCTMP production
- ✓ Established relations to pulpwood suppliers, with expectation to return to historic consumption levels
- ✓ Existing infrastructure and processes for low-cost logistics of inbound raw materials
- ✓ Efficient transportation by road, rail, and sea of BCTMP to potential packaging, hygiene, and other customers both in Nordic and global markets

Outlook

Concluding remarks

- Energy costs normalising, but pulpwood and recovered paper costs increasing
- Publication paper prices remain at unsustainable levels as fibre costs increase
- Further price increases for containerboard implemented as recovered paper costs continue to increase
- Expect negative EBITDA from packaging paper segment in 2024 due to Golbey PM1 start-up in H2 2024
- Significant focus on reducing production cost and working capital to maintain competitive position
- Maintaining a strong liquidity position as investments near completion and debt repayments increase

We create green value

Press release

Positive market development

Norske Skog's EBITDA in the second quarter of 2024 was NOK 471 million, an increase from NOK 76 million in the first quarter of 2024. The second quarter EBITDA was positively impacted by insurance at Norske Skog Saugbrugs of NOK 338 million. Despite signs of positive developments in the publication and containerboard markets, closures are still required. The process to deliver a main study on the BCTMP-production project (bleached chemi-thermomechanical pulp) at Saugbrugs has started.

" - We are receiving excellent feedback from our customers on our containerboard product quality, which is promising for our plan to deliver a total of 760 000 tonnes of packaging paper from Bruck and Golbey into the market in the coming years. In the quarter, we launched plans to start BCTMP-production at Saugbrugs. This will secure jobs and further strengthen the competitiveness of Saugbrugs. Despite declining markets and reduced machine capacities, we are very pleased to have achieved an increased market share with higher sales volumes in the second quarter of 2024 compared to the same quarter last year. This means that Norske Skog's market position with the paper industry has been strengthened," says Geir Drangslund, CEO of Norske Skog.

Cash flow from operations was NOK 299 million in the quarter compared to NOK -69 million in the previous quarter. The second quarter cash flow was positively influenced by somewhat higher sales prices and -volumes, and a decrease in working capital due CO2 related proceeds. Operating earnings in the second quarter of 2024 were NOK 364 million compared to operating earnings in the first quarter of 2024 of NOK -177 million. The operating earnings in the quarter were affected by insurance at Norske Skog Saugbrugs of NOK 338 million, non-cash changes in fair value of energy contracts in Norway amounting to NOK 44 million and depreciation of NOK 128 million.

Profit before tax in the quarter was NOK 311 million compared to loss before tax of NOK -382 million in the previous quarter. Net interest-bearing debt decreased from NOK 3 246 to 2 970 million at the end of the quarter in part due to favourable working capital changes. The equity ratio was 40%. During the quarter, Norske Skog refinanced the EUR 150 million secured bond with a five-year NOK 1 400 million unsecured bond at a lower interest rate.

" - It is great to see that the long-term refinancing of the group with a new NOK 1.4 billion bond has been completed at a lower interest rate and lower amount than the previous bond. The previous bond was secured, whereas the new one is unsecured, which makes the refinancing even more impressive," says Geir Drangslund, CEO of Norske Skog.

Operations

Total annual publication paper production capacity for the group is 1.6 million, with 1.3 million tonnes in Europe and 0.3 million tonnes in Australia. Norske Skog Bruck (PM3) started production of recycled containerboard paper in first quarter of 2023, and Norske Skog Golbey (PM1) plans to start in the second half of 2024. Norske Skog will after the ramp-up of Norske Skog Bruck and Norske Skog Golbey have an annual capacity of 760 000 tonnes of packaging paper production.

According to Euro Graph, demand for standard newsprint in Europe decreased by 1% through May 2024 compared to the same period last year. SC magazine demand decreased by around 11%. LWC paper demand decreased by around 1% through May 2024 compared to the same period last year. According to PPC trade statistics for Australia, demand for newsprint and coated mechanical decreased by 33% and 2%, respectively, through May 2024 compared to the same period last year.

Norske Skog ASA

Sjølyst plass 2
P.O. Box 294 Skøyen, 0213 Oslo
Norway

Publication paper

Operating income increased from the previous quarter mainly due to the recognition of NOK 338 million in insurance at Norske Skog Saugbrugs in the quarter, and slightly higher sales prices and sales volumes due to geographic and product mix effects. Despite positive demand sentiment in certain segments of the publication paper market, there is still a market imbalance for publication paper.

Variable costs per tonne increased in the quarter, both in absolute terms and per tonne for cost of materials mainly caused by higher recovered paper prices. Distribution costs increased slightly in the quarter. Fixed costs both in absolute terms and per tonne decreased somewhat in the quarter due to lower costs and production volumes. Group capacity utilisation was 88% in the quarter, 87% in Europe and 90% in Australasia.

Packaging paper

The packaging paper machine at Bruck is operating according to the ramp-up plan. The containerboard production will reach full capacity utilisation in the second half of 2025. The operating income for the second quarter was higher than the mill gate cash costs. The EBITDA was slightly positive due to higher sales prices and delivered volume.

Status projects

Norske Skog Golbey conversion projects

At Norske Skog Golbey, the conversion of the newsprint paper machine (PM1) into recycled containerboard paper production is progressing towards start-up in the second half of 2024. Norske Skog Golbey will eventually add 550 000 tonnes of new low-emission packaging paper capacity after ramp-up is completed, which will be fully based on recycled fibre. Golbey PM1 will utilise renewable energy generated from the biomass plant under construction at the Golbey industrial site (Green Valley Energie).

Norske Skog Skogn new TMP-line

Norske Skog Skogn successfully started the production at the net NOK 180 million new thermo-mechanical pulp (TMP) line, which substitutes recovered paper with fresh fibre. The project was completed according to budget and timeline. The total cost of the purchased machinery and equipment were about 50-70% below standard new equipment. The new TMP line will reduce variable costs, in addition to reducing NOx emissions, fossil CO2-emissions and waste sent to landfill.

“ - I would like to thank everyone who has been involved with the project for their efforts and excellent work, especially the employees and not least to all our partners who have delivered according to expectations.

This project will give us a boost both on the cost and environmental side, but not least it will give a boost in what we offer our customers. The feedback from our largest customers has so far been outstanding. We now offer paper produced only on fresh fibre from Skogn. This investment will clearly strengthen our position in the paper market," says Geir Drangslund, CEO of Norske Skog.

Norske Skog Saugbrugs BCTMP-production

Norske Skog will initiate a main study aiming to enter the bleached chemi-thermomechanical pulp (BCTMP) market by starting production at Norske Skog Saugbrugs in Halden. The new BCTMP line will produce approximately 300 000 tons of competitive pulp to meet the growing demand, especially for products in the packaging market. The BCTMP production will be based on fresh fibre, and the mill already has access to adequate energy capacity. Norske Skog Saugbrugs investment will exploit existing machinery, equipment, and infrastructure; thus, reducing the total investment significantly compared to a greenfield alternative.

Outlook

The development in the global economy is of vital importance for consumer spending, and this impacts the publication paper and packaging paper industry, and thus Norske Skog's operations and results. Norske Skog's deliveries have continued to improve during the second quarter of 2024, and is expected to improve through 2024.

The raw material and energy markets, which are important for both publication paper and packaging paper production, are expected to remain uncertain, although prices have come down closer to historical levels. Cost of recovered paper has increased significantly, and the quality and availability has deteriorated. This trend is expected to persist for the remainder of 2024. Pulpwood prices is expected to remain at higher levels for 2024.

The level of input costs and demand for paper will continue to influence paper sales prices in Europe. Both publication and packaging markets are characterised by excess capacity and capacity reductions are required to balance the markets. Utilisation is expected to remain weak until capacity is reduced.

The production of recycled containerboard in Norske Skog Bruck is expected to increase in line with the plan over the coming quarters. However, the EBITDA from the Packaging Paper segment in 2024 is expected to be negative due to allocation of fixed costs following start-up of production in Norske Skog Golbey in the second half of 2024.

Norske Skog Saugbrugs has initiated pre-engineering (main study) to produce bleached chemi-thermomechanical pulp (BCTMP), with expected final investment decision in the first half of 2025. Potential investments into a BCTMP project at Saugbrugs will result in recognition and receipt of additional insurance compensation of NOK 615 million.

In Australasia, markets remain challenging with a large share of volume being delivered in low margin export markets. There is continuous effort to improve the mill's cost position and commercial terms. Norske Skog will continue to develop its industrial sites with new fibre projects based on efficient use of certified fibre and renewable energy, both on a stand-alone basis and in partnerships.

About Norske Skog

Norske Skog is a leading producer of publication paper with strong market positions and customer relations in Europe and Australasia. The Norske Skog Group operates four mills in Europe, which produce publication paper, recycled packaging paper, energy and bioproducts. In addition, the Group operates one paper mill in Australia. Norske Skog aims to further diversify its operations and continue its transformation into a growing and high-margin business through a range of promising energy and bio product development projects. The Group has approximately 2 100 employees, is headquartered in Norway and listed on the Oslo Stock Exchange under the ticker NSKOG.

Presentation and quarterly material

The company will not hold a live presentation but will arrange a Teams-webinar today at 08:30 CEST, which can be attended by clicking the [webinar link](#) on the front page of the www.norskeskog.com.

The quarterly board of directors report, the presentation, the financial statements and the press releases are available on www.norskeskog.com, and published on www.newsweb.no under the ticker NSKOG. If you want to receive future Norske Skog press releases, please subscribe through the website of the Oslo Stock Exchange www.newsweb.no.

Pressemelding

Positiv markedsutvikling

Norske Skogs EBITDA i andre kvartal 2024 var NOK 471 millioner, en økning fra NOK 76 millioner i første kvartal 2024. EBITDA i andre kvartal ble positivt påvirket av forsikringer ved Norske Skog Saugbrugs på NOK 338 millioner. Til tross for tegn på positiv utvikling i markedene for publikasjon- og emballasjepapir, er ytterligere kapasitetsstengninger nødvendige. Prosessen med å utarbeide en hovedstudie for BCTMP-produksjonsprosjektet (bleket kjemi-termomekanisk masse) ved Saugbrugs har startet.

"- Vi får utmerkede tilbakemeldinger fra våre kunder på kvaliteten av vårt emballasjepapir, noe som er lovende for våre planer om å levere totalt 760 000 tonn emballasjepapir fra Bruck og Golbey til markedet i de kommende årene. I kvartalet lanserte vi planer om å starte BCTMP-produksjon ved Saugbrugs. Dette vil sikre arbeidsplasser og ytterligere styrke konkurranseevnen til Saugbrugs. Til tross for fallende markeder og redusert maskinkapasitet, er vi svært fornøyde med å ha oppnådd økt markedsandel med høyere salgsvolumer i andre kvartal 2024 sammenlignet med samme kvartal i fjor. Dette betyr at Norske Skogs markedsposisjon innen papirindustrien har blitt styrket," sier Geir Drangslund, administrerende direktør i Norske Skog.

Kontantstrøm fra drift var NOK 299 millioner i kvartalet sammenlignet med NOK -69 millioner i forrige kvartal. Kontantstrømmen i andre kvartal ble positivt påvirket av noe høyere salgspriser og -volumer, samt en reduksjon i arbeidskapital grunnet CO2-relaterte inntekter. Driftsresultatet i andre kvartal 2024 var NOK 364 millioner sammenlignet med et driftsresultat i første kvartal 2024 på NOK -177 millioner. Driftsresultatet i kvartalet ble påvirket av forsikringer ved Norske Skog Saugbrugs på NOK 338 millioner, endringer, uten kontanteffekt, i verdsettelsen av energikontrakter i Norge på NOK 44 millioner og avskrivninger på NOK 128 millioner.

Resultat før skatt i kvartalet var NOK 311 millioner sammenlignet med tap før skatt på NOK -382 millioner i forrige kvartal. Netto rentebærende gjeld gikk ned fra NOK 3 246 til 2 970 millioner ved slutten av kvartalet, delvis på grunn av gunstige endringer i arbeidskapitalen. Egenkapitalandelen var 40 %. I løpet av kvartalet refinansierte Norske Skog det sikrede obligasjonslånet på EUR 150 millioner med et femårig usikret obligasjonslån på NOK 1 400 millioner til en lavere rente.

"- Det er flott å se at den langsiktige refinansieringen av konsernet med et nytt obligasjonslån på NOK 1,4 milliarder er fullført til en lavere rente og et lavere utestående beløp enn det forrige obligasjonslånet. Det tidligere obligasjonslånet var sikret, mens det nye er usikret, noe som gjør refinansieringen enda mer imponerende," sier Geir Drangslund, konsernsjef i Norske Skog.

Drift

Samlet årlig produksjonskapasitet for publikasjonspapir for konsernet er 1,6 millioner tonn, med 1,3 millioner tonn i Europa og 0,3 millioner tonn i Australia. Norske Skog Bruck (PM3) startet produksjon av resirkulert emballasjepapir i slutten av første kvartal av 2023, mens Norske Skog Golbey (PM1) vil starte i løpet av andre halvår 2024. Etter igangskjøringsperioden av Norske Skog Bruck og Norske Skog Golbey, vil Norske Skog ha en årlig kapasitet på 760 000 tonn av emballasjepapir.

Ifølge Euro Graph falt etterspørselen etter standard avisepapir i Europa med 1% til og med mai sammenlignet med samme periode ifjor. Etterspørselen etter magasinpapir fra henholdsvis SC og LWC falt med rundt 11% og rundt 1% til og med mai sammenlignet med samme periode ifjor. I følge PPPCs australske handelsstatistikk falt etterspørselen etter avisepapir og LWC med henholdsvis 33 og 2% til og med mai 2024 sammenlignet med samme periode i fjor.

Norske Skog ASA

Sjølyst plass 2
P.O. Box 294 Skøyen, 0213 Oslo
Norway

«Tross fallende markeder og lavere maskinkapasiteter, er vi svært fornøyde med å ha oppnådd økte markedsandeler med et høyere salgsvolum i første kvartal 2024 sammenlignet med samme kvartal i fjor," sier Geir Drangland, konsernsjef i Norske Skog.

Publikasjonspapir

Driftsinntektene økte fra forrige kvartal, hovedsakelig på grunn av inntektsføring av NOK 338 millioner i forsikringer ved Norske Skog Saugbrugs i kvartalet, og litt høyere salgspriser og salgsvolumer grunnet geografiske- og produktmikseffekter. Til tross for positiv etterspørsel i enkelte deler av publikasjonspapirmarkedet, er det fortsatt en markedsubalanse for publikasjonspapir.

Variable kostnader per tonn økte i kvartalet, både i absolutte termer og per tonn for materialkostnader, hovedsakelig på grunn av høyere priser på returpapir. Distribusjonskostnadene økte noe i kvartalet. Faste kostnader, både i absolutte termer og per tonn, falt noe i kvartalet grunnet lavere kostnader og produksjonsvolumer. Konsernets kapasitetsutnyttelse var 88% i kvartalet, 87% i Europa og 90% i Australasia.

Emballasjepapir

Emballasjepapirmaskinen på Bruck produserer i tråd med opptrappingsplanen. Produksjonen av emballasjepapir vil nå full kapasitetsutnyttelse i løpet av det tredje produksjonsåret. Driftsinntektene for andre kvartal var høyere enn driftskostnadene. EBITDA var noe positiv på grunn av høyere salgspriser og -volum.

Nøkkeltall, andre kvartal 2024

NOK millioner (om ikke annet er oppgitt)	Q2 2024	Q1 2024	Q2 2023	YTD 2024	YTD 2023

Status prosjekter

Norske Skog Golbey konverteringsprosjekter

Ved Norske Skog Golbey gjennomføres ombyggingen av avispapirmaskinen (PM1) til produksjon av resirkulert emballasjepapir mot oppstart i andre halvår av 2024. Norske Skog Golbey vil med tiden tilføre 550 000 tonn lavutslipps emballasjepapirkapasitet etter opptrappingsfasen i 2026. Produksjonen av emballasjepapir vil være fullt ut basert på resirkulert fiber. Golbey PM1 vil bruke fornybar energi generert fra biomasseanlegget, som er under utbygging på industriområdet til Golbey (Green Valley Energie).

Norske Skog Skogn nye TMP-linje

Det var en vellykket oppstart av produksjonen ved den nye termomekaniske masse (TMP) linjen til en kostnad på netto NOK 180 millioner ved Norske Skog Skogn i andre kvartal. Tremasse basert på fersk fiber vil ertatte bruk av returpapir. Prosjektet ble fullført i henhold til budsjett og tidsplan. Totalkostnaden for innkjøpt maskiner og utstyr var omtrent 50-70% under nivået for å kjøpe nytt. Den nye TMP-linjen vil redusere variable kostnader, i tillegg til å redusere NOx-utslipp, fossile CO2-utslipp og avfall sendt til deponi.

" - Jeg vil takke alle som har vært involvert i prosjektet for deres innsats og utmerkede arbeid, spesielt de ansatte og ikke minst alle våre partnere som har levert i henhold til forventningene. Dette prosjektet vil gi oss et løft både på kostnads- og miljøsidene, men ikke minst vil det gi et løft i hva vi tilbyr våre kunder. Tilbakemeldingene fra våre største kunder har så langt vært enestående. Vi tilbyr nå papir produsert kun på fersk fiber fra Skogn. Denne investeringen vil helt klart styrke vår posisjon i papirmarkedet," sier Geir Drangslund, konsernsjef i Norske Skog.

Norske Skog Saugbrugs BCTMP-produksjon

Norske Skog vil igangsette en hovedstudie med mål om å gå inn i markedet for bleket kjemi-termomekanisk masse (BCTMP) for å starte produksjon ved Norske Skog Saugbrugs i Halden. Den nye BCTMP-linjen vil produsere omtrent 300 000 tonn konkurransedyktig masse for å møte den økende etterspørselen, spesielt for produkter i emballasjemarkedet. BCTMP-produksjonen vil bli basert på fersk fiber. Saugbrugs har allerede tilgang til tilstrekkelige energileveranser. Investeringen ved Norske Skog Saugbrugs vil utnytte eksisterende maskiner, utstyr og infrastruktur, og dermed redusere den totale investeringen betydelig sammenlignet med et nytt og komplett anlegg.

Utsikter

Utviklingen i den globale økonomien er av vital betydning for forbruket, og vil påvirke treforedlingsindustrien, og dermed Norske Skogs virksomheter og resultater. Etterspørselen etter Norske Skogs produkter har forbedret gjennom andre kvartal av 2024, og forventes å forbedre seg ytterligere i 2024.

Råvare- og energimarkedene, som er viktige for både publikasjons- og emballasjepapir, forventes å forbli usikre selv om prisene har kommet nærmere historiske nivåer. Kostnadene for resirkulert papir har økt betydelig, men både kvaliteten og tilgjengeligheten har blitt forverret. Denne trenden forventes å vedvare gjennom hele 2024. Massevirkeprisene forventes å holde seg på høyere nivåer i 2024.

Utvikling av innsatskostnader og etterspørsel etter papir vil fortsatt påvirke papirsalgspisene i Europa. Både publikasjons- og emballasjepapirmarkedet er preget av overskuddskapasitet, og kapasitetsstenginger i industrien er nødvendig for å bedre markedsbalansen. Kapasitetsutnyttelsen forventes å forbli svak i den kommende perioden ettersom ytterligere stenginger er nødvendig.

Produksjonen av resirkulert emballasjepapir i Norske Skog Bruck forventes å øke i tråd med planene i de neste kvartalene. Imidlertid forventes negativ EBITDA fra emballasjepapirsegmentet i 2024 på grunn av intern fordeling av faste kostnader knyttet til produksjonsoppstart av Norske Skog Golbey i andre halvdel av 2024.

Norske Skog Saugbrugs har igangsatt en hovedstudie for å produsere bleket kjemi-termomekanisk masse (BCTMP), med en forventet investeringsbeslutning i første halvdel av 2025. Potensielle investeringer i et BCTMP-prosjekt ved Saugbrugs vil utløse mottak av ytterligere NOK 615 millioner i forsikringskompensasjon.

Australasia forblir markedene utfordrende med en stor andel av volumet levert i eksportmarkeder med lave marginer. Det gjøres kontinuerlig innsats for å forbedre fabrikkens kostnadsposisjon og kommersielle vilkår. Norske Skog vil fortsette å utvikle sine industristeder med nye fiberprosjekter basert på effektiv bruk av sertifisert fiber og fornybar energi, både på selvstendig basis og i partnerskap.

Om Norske Skog

Norske Skog er en ledende produsent av publikasjonspapir med sterke markedsposisjoner og kundeforhold i Europa og Australasia. Norske Skog-konsernet driver fire fabrikker i Europa som produserer trykkpapir, resirkulert emballasjepapir, energi og bioprodukter. I tillegg driver konsernet en papirfabrikk i Australia. Norske Skog tar sikte på å diversifisere virksomheten ytterligere og fortsette omstillingen til en voksende og høy-margins virksomhet gjennom en rekke spennende energi- og bioproduktprosjekter. Konsernet har cirka 2 100 ansatte, hovedkontor i Norge og er notert på Oslo Børs under tickeren NSKOG.

Presentasjon og kvartalsmaterieil

Selskapet vil ikke holde en live presentasjon, men vil arrangere et Teams-webinar i dag kl. 08:30 CEST, som kan følges ved å klikke på webinarlinken på forsiden av www.norskeskog.com.

Kvartalsrapporten fra styret, presentasjonen, regnskapene og pressemeldingene er tilgjengelige på www.norskeskog.com, og publisert på www.newsweb.no under tickeren NSKOG. Hvis du ønsker å motta fremtidige pressemeldinger fra Norske Skog, vennligst abonner via nettsiden til Oslo Børs www.newsweb.no.
